National Processing Policies

Introductory Note

These national processing policies have been revised to reflect data code set requirements set forth under the Administrative Simplification Provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and related regulations. It is the policy of Delta Dental to comply with all such requirements as well as to require all Delta Dental member companies and their participating dentists to comply with such requirements. However, consistent with HIPAA, Delta Dental exercises its right to determine claims reimbursement procedures and requires the processing of such codes in accordance with the following policies, unless prohibited under other applicable law or specific group contract provisions (described below). Notwithstanding, treatment of procedures under the national processing policies, dentists are required to utilize those procedure codes reflective of services rendered and in accordance with HIPAA. Amounts charged under any procedure shall not be inflated or manipulated in light of the processing policies. Delta Dental member companies shall ensure that their application of these processing policies is consistent with their contractual obligations to groups and enrollees.

General Policies

General policies (GP) related to each category of procedure codes precede the category code listing. Policies for specific procedure codes are listed in each category after the codes and nomenclature.

Terms of group contracts vary. Policies in this Handbook that address benefits, limitations and exclusions are "model" policies that have not been tailored to reflect the specific terms of applicable group contracts. This Handbook may not fully or accurately reflect the terms of applicable group contracts, and may be inconsistent with such terms. In all cases, the terms of group contracts take precedence over Dentist Handbook policies. Please contact the member company listed on the patient's identification card for the specific terms of a group contract.

For the purposes of this manual, the following definitions apply:

- Allowance:** The amount of Delta Dental's payment for the procedure benefited.
- Approved Amount:** The total fee a participating dentist agrees to accept as payment in full for a procedure. It includes both the Delta Dental allowance and the patient responsibility. Participating dentists agree not to collect from the patient any difference between the approved amount and their actual fee for the procedure.
- Denied/Deny** If the fee for a procedure or service is denied, the procedure or service is not a benefit of the patient's coverage and the approved amount is collectable from the patient. As previously stated, specific group contract provisions take precedence over processing policies. It is recommended that the dental office contact the appropriate member company for the group account to determine the specific benefits, limitations and exclusions for each group.
- Disallowed:** If the fee for a procedure or service is disallowed, it is not benefited by Delta Dental nor collectable from the patient by a participating dentist.
- Alternative Benefit:** In cases where alternative methods of treatment exist, benefits are provided for the least costly, professionally acceptable treatment. This determination is not to recommend which treatment should be provided. It is a determination of benefits under terms of the

patient's coverage. The dentist and patient should decide the course of treatment. If the treatment rendered is other than the one benefited, the difference between Delta Dental's allowance and the approved amount for the actual treatment rendered is collectable from the patient.

In Conjunction With: In conjunction with means as part of another procedure or course of treatment including, but not limited to, being rendered on the same day.

Processed as: When a procedure is processed as a different procedure, participating dentists agree to accept all the limitations, processing policies, and approved amounts that apply to the procedure Delta Dental benefits.

All services provided to Delta Dental members are subject to the following general policies:

- Documentation of extraordinary circumstances can be submitted for review by report.
- Fees for completion of claim forms and submission of documentation to Delta Dental to enable benefit determination are not benefits. They are not collectable from the patient by a participating dentist.
- Infection control and OSHA compliance are included in the fee for the dental services provided. Separate fees are disallowed and not collectable separately from the patient by a participating dentist.
- Multistage procedures are reported and benefited upon completion. The completion date is the date of insertion for removable prosthetic appliances. The completion date for immediate dentures is the date that the remaining teeth are removed and the denture is inserted. The completion date for fixed partial dentures and crowns, onlays and inlays is the cementation date regardless of the type of cement utilized. The completion date for endodontic treatment is the date the canals are permanently filled.
- Charges for procedures determined not to be necessary or not meeting generally accepted standards of care may be denied or disallowed. Many of the processing policies that follow detail payment procedures that are based on the timing and sequence of inter-related procedures. However, the timing and sequencing of treatment is the responsibility of the dentist rendering care and should always be determined by the treating dentist based on the patient's needs.
- When a procedure is by report and subject to coverage under medical, it should be submitted to the patient's medical carrier first. When submitting to Delta Dental, a copy of the explanation of payment or payment voucher from the medical carrier should be included with the claim, plus a narrative describing the procedure performed, reasons for performing the procedure, pathology report if appropriate, and any other information deemed pertinent. In the absence of such information, Delta Dental will not benefit the procedure.

Quadrant: D4210, D4230, and D4341: Four or more diseased teeth/periodontium distal to the midline are considered a quadrant. Tooth bounded spaces are not counted in making this determination. When these periodontal procedures do not meet all of these criteria use codes D4211, D4231 and D4342 respectively.

D4240, D4260: Four or more diseased teeth/periodontium or bounded tooth spaces distal to the midline are considered a quadrant. A tooth bounded space counts as one space irrespective of the number of teeth that would normally exist in the space. Terms of group contracts vary. Policies in this Handbook that address benefits, limitations and exclusions are "model" policies that have not been tailored to reflect the specific terms of applicable group contracts. This Handbook may not fully or accurately reflect the terms of applicable group contracts, and may be inconsistent with such terms. In all cases, the terms of group contracts take precedence over Dentist Handbook policies. Please contact the member company listed on the patient's identification card for the specific terms of a group contract.

Notes

Limited orthodontic treatment is defined as:

Orthodontic treatment with a limited objective, not involving the entire dentition. It may be directed at the only existing problem, or at only one aspect of a larger problem in which a decision is made to defer or forego more comprehensive therapy. Examples of this type of treatment would be treatment in on arch only to correct crowding, partial treatment to open spaces or upright a tooth for a bridge or implant and partial treatment for closure of a space(s).

Interceptive orthodontic treatment is defined as:

Treatment using codes for interceptive treatment are for procedures to lessen the severity or future effects of a malformation and to eliminate its cause. An extension of preventive orthodontics includes localized tooth movement. Such treatment may occur in the primary or transitional dentition and may include such procedures as the redirection of ectopically erupting teeth, correction of isolated dental crossbite, or recovery of recent minor space loss where overall space is adequate. The key to successful interception is intervention in the incipient stages of a developing problem to lessen the severity of the malformation and eliminate its cause. Complicating factors such as skeletal disharmonies, overall space deficiency, or other conditions may require future comprehensive therapy. Early phased of comprehensive therapy may utilize some procedures that might also be used interceptively, but such procedures are not considered in those applications.

Comprehensive orthodontic treatment is defined as:

This code should be used when there are multiple phases of treatment provide at different states of dentofacial development. For example, the use of an activator is generally stage one of a two-stage treatment. In this situation, placement of fixed appliances will generally be state two of a two-stage treatment. Both phases should be listed as comprehensive treatment modified by the appropriate stage of dental development. This is used to report coordinated diagnosis and treatment leading to the improvement of the patient's craniofacial dysfunction and/or dentofacial deformity including anatomical, functional, aesthetic relationships. Treatment usually, but not necessarily, utilizes fixed orthodontic appliances. Adjunctive procedures, such as extractions, maxillofacial surgery, nasopharyngeal surgery, myofunctional or speech therapy and restorative or periodontal care, may be coordinated disciplines. Optimal care requires long-term consideration of patient's need and periodic reevaluation. Treatment may incorporate several phases with specific objectives at various stages of dentofacial development.
