

ODS SPECIALTY MEDICATIONS

Specialty medications are high-cost prescription products frequently prescribed for the treatment of complex medical conditions. These drugs often require special handling, careful administration, as well as close supervision and monitoring by a trained medical professional.

All specialty medications, including those listed below, are available for up to a 30 day supply of medication and require a Prior Authorization before they can be dispensed. Prior Authorization (PA) refers to the process by which a member obtains approval from ODS prior to payment for a specific product or service. To request a Prior Authorization for your specialty medication, please contact ODS Pharmacy Customer Service at 1-888-361-1610 and we will work directly with your healthcare provider to complete this process.

Specialty medications are subject to plan provisions and may not be covered under your specific pharmacy benefit. Please refer to your member handbook to find your copayment / coinsurance amounts and specific medication exclusions.
